## Office Memorandum • UNITED STATES GOVERNMENT

TO : Deputy Director of ~~Training~~ (Special)

DATE: JAN 11 1952

FROM : Assistant Director for Communications

SUBJECT: Communications Testing Facilities

1. The Office of Communications has the need for a field laboratory and testing facility where communications equipment can be given extensive field and operational tests. The equipment and techniques to be tested will be agent equipment, air drops, beacons, homing devices, air-ground communications, infra-red and other electronic and mechanical devices used in conjunction with agency operations.

2. This activity will require a building approximately 20 by 40 feet with commercial power requirements of approximately 20 KW of single phase 110 volt power. This building should be so placed as to afford a space for erection of limited antenna facilities.

3. It is requested that an inspection party from the Office of Communications be granted access to Project [REDACTED] area to determine the feasibility of incorporating such an activity into the overall [REDACTED] Project.
